

## MEDIA RELEASE

### OCP LAUNCHES AN ORGANIC NEMATICIDE

OCP eco-nemguard is a granular product infused with a garlic extract containing polysulfides. Once mixed into the soil the granules begin releasing the polysulfides which kill nematodes living freely in the soil ie before they've infected plant roots.

Key product features:

- Kills and suppresses parasitic soil nematodes including root-knot nematodes
- Active ingredient is a garlic extract containing polysulfides
- Highly concentrated (2g treats 1m<sup>2</sup>)
- Granules continue releasing polysulfides for 4-6 weeks
- Registered for use in veggie patches (no withholding period)
- Approved for use in organic gardens
- RRP \$44.86 (350g)

OCP eco-nemguard is ranged nationally in the larger Bunnings stores with stock now on shelf. It is also available for independent hardware stores and nurseries to carry.

Please reach out if you have questions about the product or would like to arrange an interview. Product samples for media are available on request.
